

System Pressure Advisory!

Water customers in Pinehurst and Seven Lakes of the Moore County Public Utilities water system are experiencing a period of low water pressures due to an unknown cause. It is recommended that you **cease lawn irrigation and use water conservatively** until water pressures are restored.

We are working diligently to restore complete water service. Even though the water mains will be thoroughly flushed following this low-pressure period, water quality testing will need to be completed. Water discoloration may also be experienced. Therefore, when water service is restored, consumers are advised to flush their service piping then **boil all water** used for human consumption (including drinking, making ice, brushing teeth, washing dishes and food preparation) or use bottled water. Vigorous boiling for one (1) minute should kill any disease-causing organisms that may be present in the water. You will be advised when the water tests show the water is safe to drink.

Water customers are strongly urged to **conserve water** whenever possible. This advisory remains in effect until further written notification is issued.
